Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A computer science student	Understand complex algorithms and write code without errors	I keep getting stuck on difficult bugs and error messages	The concepts are complicated and my textbooks are too generic	Frustrated, overwhelmed, and stressed.
PS-2	A self-taught learner	Prepare for my upcoming technical exams and interviews	I struggle to stay consistent and often want to give up	I lack a mentor to guide me and give me encouraging	Unmotivated, lonely, and anxious.

				feedback when I fail	
PS-3	A high school student	Master a new, difficult subject for my final exams	I can't figure out if I am actually learning or just memorizing	Standard learning tools don't adapt to my learning pace or emotional state	Confused, bored, and insecure.
