

Demonstration of Proposed Features

Date	8 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrate d (Yes / No)	Remarks
1	Local Emotion Detection	Deep learning model (BiLSTM/BERT) that accurately classifies student text into emotional states.	Implemented	Yes	Successfully detects emotions like Frustration, Confidence, and Confusion locally.
2	Generative AI Coaching	Integration with Google Gemini API to generate empathetic, context-aware academic responses.	Implemented	Yes	Real-time dynamic prompting works perfectly and handles edge cases gracefully.
3	User Authentication	Secure Login and Signup system using bcrypt password hashing.	Implemented	Yes	Users can securely log in and access their personal history.
4	Database & History Tracking	SQLite integration via SQLAlchemy to log user inputs, detected emotions, and AI responses.	Implemented	Yes	Database successfully tracks interactions and maintains state across sessions.
5	Analytics Dashboard	Interactive Plotly visualizations to display a user's emotional journey over time.	Implemented	Yes	Dynamic Pie charts successfully render based on the logged SQLite history data.
6	Responsive UI	A clean, intuitive Streamlit web interface with quick-action buttons for seamless interaction.	Implemented	Yes	UI is highly responsive, handles caching correctly, and provides instant feedback.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
